

LurraLife O2 Drops®

O2 Drops® from LurraLife contain proprietary Activated Stabilized Oxygen and Lyophilic Third State Minerals, which renew and fortify the body at the cellular level. O2 Drops has been shown to boost overall health, energy, and focus; improve mental and physical performance; promote weight loss and improved sleep; and strengthen immunity and promote healing.

- Boosts overall health, energy, and focus
- Improves mental and physical performance
- Promotes weight loss and improved sleep
- Strengthens immunity and faster recovery
- Helps relieve pain and promotes healing

Oxygen plays a powerful and primary role in your body's physical and mental performance. An increasing number of researchers now confirm that the best way to improve health and fitness is related to the optimum oxygenation of every cell. Sufficient oxygen is needed for the body to rebuild itself as well as for our abilities to think and act. It is also vital for proper metabolic functions, blood circulation, assimilation of nutrients, elimination of cellular and metabolic waste, and a strong immune system. Conversely, low levels of oxygen disrupt the body's ability to function properly. Unfortunately, even though we are surrounded by oxygen, our modern lives are teeming with unavoidable factors that impede it from reaching our cells, where it is needed most.

The proprietary Activated Stabilized Oxygen (ASO®) in O2 Drops® has been independently tested by highly regarded researchers at laboratories and universities across the world. No other activated oxygen supplement formula has undergone as much scrutiny and validation. This research has established that O2 Drops are extremely effective and completely safe to use as a nutritional supplement.

CAUTION: Always consult with your healthcare practitioner before taking this or any health supplement, especially if you are taking prescription medications, under a doctor's medical care, at risk for or have any illness or health condition, pregnant or nursing, or under age 18. These statements have not been evaluated by the U.S. Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease or medical condition. The information is provided for informational purposes. Results may vary. You may not experience the same benefits from using this product.

INDEPENDENTLY TESTED + RESEARCHED

O2 – also called O2 Drops – is packed with an exclusive bio-available form of dissolved oxygen combined with the minerals that the body needs the most. This revolutionary nutritional supplement is scientifically formulated to provide activated oxygen molecules and essential trace minerals to your cells, fortifying your body and creating a level of health and vitality you've never experienced before.

The one-of-a-kind Activated Stabilized Oxygen (ASO) in O2 Drops makes it the only pH balanced oxygen supplement available today. Plus, it is manufactured in an FDA CGMP Certified Lab to ensure the quality of every bottle. O2 Drops can be orally ingested, or applied topically or sublingually for the same effectiveness. The recommended serving is 15 drops each time, three times daily. Some people use less while others use more drops per serving based on the results they experience. O2 Drops are completely safe to use in any amount.

"I believe ASO®, because of its inherent "energy factor" potential, may just be the "Rosetta Stone" that unblocks the pathogenetic mechanisms of disease in general and provides the knowledge for proper disease prevention management. ASO® Activated Oxygen is not simply an important nutrient supplement but a dynamic energy molecule. ASO® has an extremely high ORP (Oxidation Reduction Potential) of 950 mV. That means ASO® possesses energy that can be transferred to the surrounding environment, potentiating the bioenergetic processes and correcting or reversing underlying cellular dysfunctions. In other words, ASO® works like a bright new cellular battery."

– Menicos A. Spartalis, M.D., Vascular Surgeon

"In the beginning I used ASO® activated oxygen rather cautiously for cleaning the face for local uses thus assessing the action of this product as a bactericide. Later I started recommending it for the detoxification of the organism thus testing its activity for neutralizing free radicals. I gave it to my patients with tired and rather lifeless skin, with black circles under the eyes or individuals suffering from eczema and dermatitis. The results were fantastic, and this made me bolder and able to recommend it to athletes, smokers, persons with feebleness, lack of energy, chronic bronchitis, asthma and to people with frequent viral infections due to a weakness in their immune system as well as to patients with bed-sores, etc. In all these cases the results have been excellent."

– Dr. Margarita Chilindri, M.D., Pathology and Dermatology

"ASO® stabilized oxygen is undoubtedly a new powerful tool in the modern world of medicine. The more we get to know about it, the more we can treat without side effects. ASO® is a tool, a key to a noble dream for a better world, better life quality and life itself. ASO® works as a strong antiseptic on the wound, killing anaerobic and fungal microorganisms. ASO® increases the healing process. ASO® was effective in dilutions and in the oral treatment of Stomatitis Aphthosa in the mouth and gums. ASO® was effective as a topical treatment against Oral Candidiasis and tongue's fungal plaques. ASO® was effective on degenerative lip dermatitis and Angulus Infectiosus in mouth angles. ASO® was effective on eczematous areas as a moisturizing and skin repair agent."

– Dr. Marios L. Christofinis, M.D., Ph.D.

"Conclusion: A definite improvement was noticed in between the sprints of the trials with placebo and the controlled ASO® stabilized liquid oxygen. This would indicate the fact that athletes who consumed ASO® stabilized liquid oxygen were able to reproduce similar and sustained effort during both sprints as compared to those that consumed the placebo."

– From "Stabilized Liquid Oxygen as an Ergogenic Aid for Sprinters in a Competitive / Heat Scenario," 2004. Dr. Hj Danish Zaheer Hj Zaheer uddin M.D., PhD. and David Hennessy Bsc (Hons), Sports Medicine & Research Centre, Department of Youth & Sports, Brunei Darussalam
